Your home works better with Niko

# Your home works better with Niko

## **Your home works better with Niko Home Control**

Live more comfortably and safer, whilst saving maximum energy. Niko Home Control controls the electrical devices and systems in your home. You control everything with switches, a flexible control and/or your smartphone. The possibilities of Niko Home Control are endless. Thanks to its timeless design, the system fits seamlessly into your interior.

## **Ready for the future**

Niko Home Control is the ideal solution for enabling your electrical devices to evolve alongside our rapidly changing lifestyles and methods of communication. The home automation system pushes the boundaries of comfort, safety, user-ease and energy consumption. Niko Home Control is continually evolving to keep up with the latest trends and standards. With Niko's wireless solutions, you can easily install switches anywhere in the house, without creating any dust.

## **For you and your family**

With Niko Home Control, you and your family are kept comfortable and safe. Turn off all of the relevant items in your home with one press of a button? No problem at all with Niko Home Control.

## **Belgian quality and expertise**

With 100 years of experience, including over 20 years in home automation, Niko is the market leader and an established name in Belgium. With Niko Home Control, you're choosing genuine Belgian expertise. Innovation is at the heart of everything we do.

## **Central platform for your home systems**

Smart systems from other brands are easily connected to Niko Home Control. And you can operate your heating, ventilation, audio and whatever else you like. API integration with Niko partner systems, hobby API or API for system integrators.

# What can you do with Niko Home Control and Daikin?\*

Daikin residential air to water heat pumps (Daikin Altherma range) and gas boilers (NDJ range) providing space heating, cooling (only for Altherma & optional) and domestic hot water

- Control and monitor the temperature in your home
- Monitor the outdoor temperature
- Control and monitor the program routine (e.g. Holiday, Automatic)
- Control and monitor the operation routine (e.g. Heating, Cool, Auto)
- Monitor and set the heating/cooling system operation status (on or off)
- Monitor your Domestic Hot Water temperature
- Boost your Domestic Hot Water temperature
- Control and monitor Domestic Hot Water program routine (e.g. Holiday, scheduling)

Daikin residential air to air heat pumps (air conditioning) providing space heating & cooling:

- Control and monitor the temperature in your home
- Monitor the outdoor temperature
- Control and monitor the program routine (e.g. Holiday, Automatic)
- Control and monitor the operation routine (e.g. Heating, Cool, Auto)
- Monitor and set the heating/cooling system operation status (on or off)
- Monitor and set the fan speed
- Boost your fan speed

You can have those functions directly available in your NHC user interface , or they can be combined in routines/actions to control multiple items simultaneously via one simple button press (e.g. Turn off all lights and reduce the set point temperature by using the all-off/Leaving home button).

You always can open the Daikin APP for more advanced settings and configurations.

(\*) available functionality within Niko Home Control depends upon the specific installation features of the Daikin system.

# What do you need?

No special electrical wiring is required to connect both systems. Both systems are working independently and can be connected to each other via your home network and internet.
